

Landscaping & Outdoor Design

Outdoor Spaces as Beautiful as Your Interior.

We design and build custom outdoor environments — lush planted gardens, stone pathways and full outdoor living areas with hardscaping, lighting and irrigation systems.

From Concept to Completion — Your Dream Outdoor Space

Every element designed for Bay Area climate and built to last — gardens, hardscaping, lighting and irrigation working together as one beautiful outdoor environment.

From Concept to Completion — Your Dream Outdoor Space

Every element is thoughtfully designed for Bay Area climate and built to last — with planting, hardscaping, lighting and irrigation working together in one cohesive outdoor environment.

WHAT'S INCLUDED

01 Landscape Design & Planning

Site analysis, concept drawings, and planting plans tailored to sun exposure, soil conditions, and your aesthetic goals.

02 Hardscape Construction

Patios, pathways, retaining walls, steps, and outdoor platforms in stone, pavers, or decorative concrete.

03 Planting & Softscape

Trees, shrubs, groundcovers, and lawn installation with water-wise, Bay Area climate-appropriate selections.

04 Retaining Wall Construction

Structural and decorative retaining walls that manage grade, support slopes, and prevent erosion.

05 Irrigation System Design & Install

Drip and spray systems with smart controllers for efficient watering and year-round plant health.

06 Outdoor Lighting

LED path lights, uplights, step lights, and accent lighting that extend beauty and usability after dark.

07 Artificial Turf Installation

Premium synthetic grass for low-maintenance, year-round green lawns ideal for California drought conditions.

08 Drainage Solutions

French drains, channel drains, and grading corrections to redirect water and protect your property.

WHY CHOOSE TOP TIER

Design + Build in One

Our in-house team handles both design and installation, so your vision is executed exactly as planned.

California Climate Expertise

We design for Bay Area microclimates, drought regulations, and plant performance all year long.

Complete Integration

Structures, plants, lighting, drainage, and irrigation are designed as one cohesive outdoor environment.
