

Lighting Design & Electrical

Power, Safety & Ambiance — All in One.

Licensed electricians handling panel upgrades and full rewires — combined with lighting design that transforms every room with layered, modern systems built for beauty and efficiency.

Safe Electrical Systems. Stunning Lighting Design.

From the panel to the pendant — every circuit properly sized, every fixture perfectly placed for a home that's safe, efficient and beautifully lit throughout.

WHAT'S INCLUDED

Complete electrical solutions and lighting design to power your home safely and light it beautifully.

01 Electrical Panel Upgrades

Upgrade to 200A or 400A service supporting EV chargers, home offices, smart appliances and new room additions.

05 Decorative Pendant & Chandelier Installation

Statement pendants, chandeliers and linear suspension fixtures safely installed over islands, dining areas and entries.

02 Full Home Rewiring

Complete rewiring of older homes to modern cable standards with GFCI/AFCI protection and full NEC code compliance.

06 Under-Cabinet & Accent Lighting

LED strip systems, puck lights and cove lighting creating depth, warmth and visual interest throughout kitchens and living spaces.

03 New Circuit Installation

Dedicated circuits for appliances, HVAC, home theaters, hot tubs, EV chargers, kitchen upgrades and additions.

07 Smart Lighting & Dimmer Systems

Lutron, Leviton and Caseta smart switches, dimmers and scene controls for effortless lighting management from anywhere.

04 Recessed Lighting

LED can lights, wafer lights and gimbal trims in precise layouts delivering even, flattering illumination in every room.

08 Outdoor & Landscape Lighting

Low-voltage pathway lights, uplights, soffit lighting and security lighting for safety and enhanced curb appeal after dark.

WHY CHOOSE TOP TIER

Licensed & Permitted

All electrical work performed by licensed electricians and city-permitted — protecting your home's value and your family's safety.

Aesthetic + Technical

We bridge electrical functionality and design to create lighting schemes that are both code-compliant and visually stunning.

EV & Smart Home Ready

We future-proof your system with EV charging infrastructure and smart panel capacity for tomorrow's technology needs.

Ready to Power & Light Your Home Beautifully?
